FIBRE

CONNECTION WITHOUT MC01 KIT

2

MORE OPTIONS

SEE PAGE 4

FIBRE OPTIC LINK

SINGLE MODE

PRO: LOWEST POSSIBLE JITTER AND BEST ACCURACY

CONTRA: GREAT CARE MUST BE MADE AT INSTALLATION WITH REGARDS TO TIGHT BENDS IN THE CABLE AS LIGHT TRANSFER CAN BE LOST

MULTI MODE

PRO: MORE ROBUST AND FORGIVING AT INSTALLATION TYPICALLY USED FOR IT NETWORKS

CONTRA: SLIGHTLY HIHER PONTENTIAL JITTER WHEN COMPARED TO SINGLE MODE ALTHOUGH STILL FAR MORE ACCURATE AND STABLE THAN COPPER
